

INSURANCE POLICY DOCUMENT — POLICY ID: P005

Policy Classification: Critical Illness Indemnity & Specialized Oncological Benefit Plan **Issued By:** SecureShield Health & Medical Indemnity Corporation **Target Object:** Insured Primary Policyholder **Regulatory Status:** Active Legal Framework for Critical Illness Benefit Underwriting

SECTION 1: SCOPE OF COVERAGE & INSURED PERILS

This specialized critical illness policy provides a predefined lump-sum financial benefit and specialized treatment indemnity upon the confirmed clinical diagnosis of major life-threatening medical conditions. The policy actively covers the following explicitly defined perils:

- Lump-Sum Critical Illness Payout:** Immediate lump-sum financial compensation awarded upon the first definitive clinical diagnosis of covered conditions, including major cardiovascular incidents, stroke, permanent paralysis, or end-stage renal failure.
- Oncological Care Indemnity:** Comprehensive coverage for active cancer treatments, surgical tumor removals, targeting therapies, chemotherapy cycles, and advanced clinical protocols.
- Specialized Radiation Therapy:** Indemnity covering targeted external beam radiation, brachytherapy, cyberknife interventions, and associated high-precision radiological hospital infrastructure costs.
- Second Medical Opinion Registry:** Provision of fully covered domestic or international specialist consultations to validate diagnostic paths and treatment protocols for any covered condition.

SECTION 2: COMPREHENSIVE COVERAGE LIMITS & LIABILITY CAP

The liability of the corporation is bound strictly to the specific financial schedules designated below. Payouts are restricted by specific survival windows and chronological milestones.

- Lump-Sum Diagnostic Benefit Payout:** The maximum aggregate lump-sum financial liability limit awarded upon a verified critical illness diagnosis is capped strictly at **Rs. 1,500,000 (Fifteen Lakh Rupees)**.

- **Chemotherapy & Target Therapy Annual Limits:** Active clinical oncology drug infusions, target therapies, and chemotherapy procedures are capped up to a maximum threshold of **Rs. 800,000 (Eight Lakh Rupees)** per policy year.
 - **Specialized Radiation Therapy Caps:** Financial allocations for high-precision radiological treatments and hospital oncology room infrastructure are capped strictly at **Rs. 400,000 (Four Lakh Rupees)** per treatment lifecycle.
 - **Survival Window Clause:** A mandatory condition specifying that the lump-sum diagnostic benefit will only be disbursed if the insured individual survives for a minimum duration of **30 consecutive days** post-diagnosis.
-

SECTION 3: POLICY EXCLUSIONS & NON-PAYABLE CLAIMS

The corporation is not legally liable to execute benefit transfers, process payouts, or clear specialized medical bills under this policy if the condition implicates the following exclusions:

- **Initial Manifestation Waiting Period:** Absolute exclusion of any claims, diagnoses, or treatments for symptoms or medical conditions manifesting within the initial **90-day waiting period** from the exact date of policy inception.
 - **Congenital Anomalies & Genetic Conditions:** Total exclusion of any critical illness conditions arising directly from hereditary disorders, congenital external/internal anomalies, or pre-mapped genetic malfunctions present from birth.
 - **Substance Dependency & Chemical Abuse:** Rejection of claims if the oncological or cardiovascular condition is clinically proven to stem directly from long-term tobacco use, chronic alcoholism, narcotic dependency, or drug abuse.
 - **Non-Covered Early-Stage Malignancies:** Exclusion of early-stage micro-carcinomas, non-invasive carcinoma-in-situ (CIS), localized skin cancers, or low-grade prostate tumors that do not meet the strict policy definitions of advanced malignancy.
-

SECTION 4: MANDATORY CLAIM REQUIREMENTS & DOCUMENTATION

To successfully initiate, validate, and verify an active critical illness or cancer care benefit payout evaluation process, the claimant must present the following verified evidentiary proof:

1. **Definitive Histopathology Report:** Presentation of an authentic histopathology or biopsy diagnostic confirmation sheet signed by a certified Chief Pathologist, validating the exact cellular characteristics of the malignancy.
2. **Oncologist Consultation Summaries:** Detailed clinical timelines, daily case notes, and treatment blueprints compiled by a registered, practicing medical oncologist.
3. **Multi-Stage Biometric Blood Panels:** Comprehensive hematological profiles, tumor marker tracking evaluations, and organ function panels indicating baseline health metrics.

4. **Official Medical Board Validation Certificate:** A signed declaration from a designated independent institutional medical board confirming that the diagnosed condition satisfies the exact technical criteria outlined in the policy schedule.

SECTION 5: GENERAL CLAIMS PROCESSING & EVALUATION RULE

All submitted critical illness claim applications undergo automated risk scoring and policy coverage validation parameters.

All coverage validation parameters are strictly subject to the stated incident limits, explicit policy exclusions, and strict claim requirements documented above.

Regulatory Disclaimer: Any automated or AI-generated recommendation (such as APPROVE, REJECT, or REFER) should not be treated as a definitive or final claim decision. A certified human claims handler and authorized insurance underwriter must thoroughly review the generated recommendation, examine the associated evidence logs, and execute the final authorization.
